

If you downloaded the program files before 18 May 2026 from our website, or you are current a CoolDUCT user, please Use the files inside the folders "**V8.0 Files**" and "**V8.0 Block**" to upgrade your CoolDUCT program to version 8.0.

Updated Info

CoolDUCT v8.0 is compatible with AutoCAD 2027 and AutoCAD MEP 2027 on Windows 10 & 11

It has over 50 new features for drawing Flat Oval Duct fittings and creating Builderswork layout, etc.

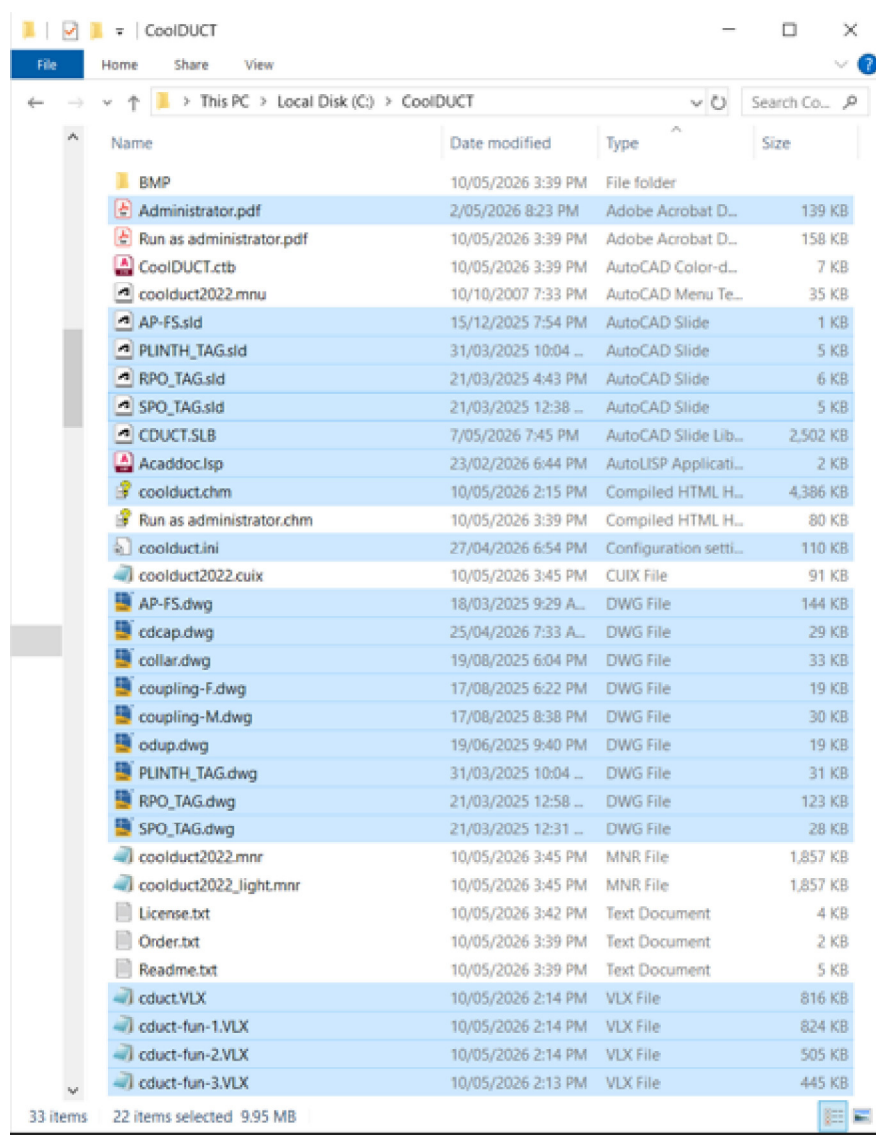

For CoolDUCT version 7 users, the upgrade fee is \$300 + GST.

For CoolDUCT version 6 users, the upgrade fee is \$450 + GST.

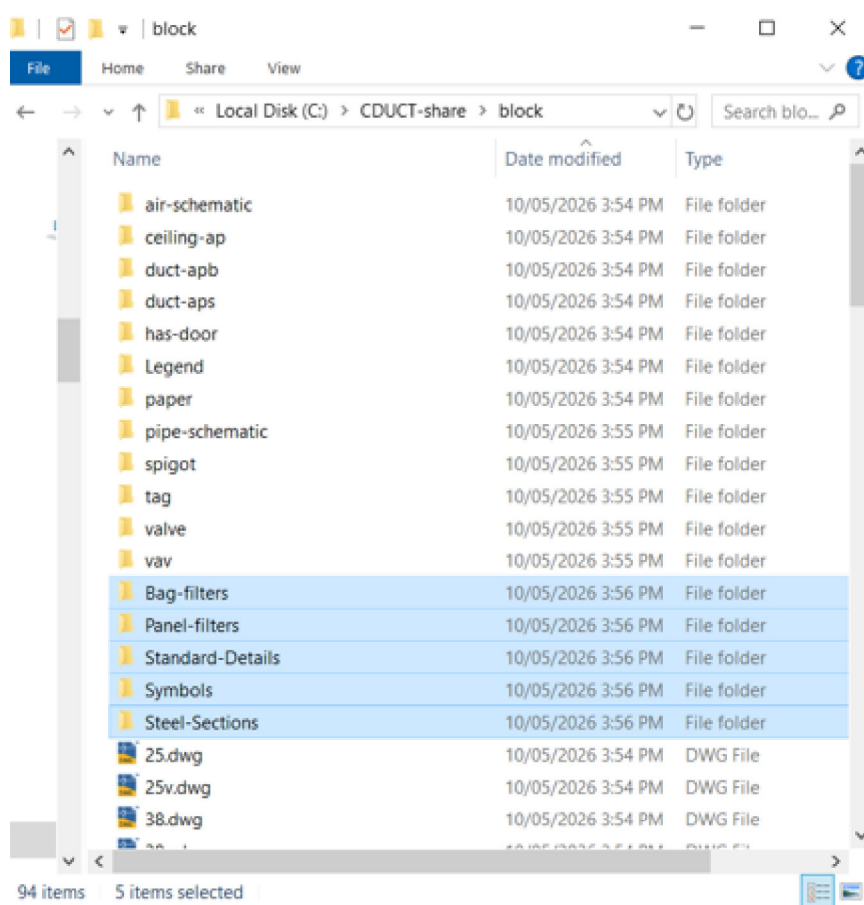

Instruction

Please do not completely delete or replace your existing "BMP" folder inside your original "CoolDUCT" folder. Also please do not completely delete or replace your original "CoolDUCT" folder. Otherwise you will have to reinstall CoolDUCT program and additional fees will apply for a new registration code

1. Close all AutoCAD program.
2. Copy **all files** inside folder "**V8.0 Files**" to your original "**CoolDUCT**" folder which is located on local hard drive such as "C:\CoolDUCT". Replace the original files. Refer to picture below for detail.

3. Copy **five folders** inside folder "**V8.0 Block**" to your original "**block**" folder that is inside the "CDUCT-share" folder which is located on local hard drive such as "C:\CDUCT-share". Refer to picture below for detail.

4. restart AutoCAD with a new drawing. CoolDUCT will be upgraded. The existing menu will be changed once the upgrade has been activated.

(To run CoolDUCT on AutoCAD 2027, Add "CoolDUCT" folder location to AutoCAD 2027's Support File Search Path..)
